Buenas tardes Denise,

Today we started the vapor borings at PRICO East. Unfortunately, the lamp on the field GC blew out and a replacement will be shipped for delivery tomorrow. Frances is contacting the Fedex driver to determine what time he may deliver it to the site, and, if necessary, we will go to Fedex to pick it up ourselves if his delivery will be too late in the day tomorrow. The GC machine will have to be re-calibrated once the new lamp is installed.

Susan
